OUR FULLY
CUSTOMISED
SOLUTIONS**

Time is a scarce and expensive resource particularly in Australia which is why finishing accuracy and speed has never been such a crucial part of your business as it is today.

We have searched for the very best components across the globe and integrated them together to form the most cost effective and versatile robotic flatbed cutter package in the Samurai 2415R.

Our experienced team can also tailor solutions to suit your production requirements by collaborating experience and practical processes.

Ontrak has partnered with some of the largest robotic service companies in Australia to ensure that your support is prompt and effective.

We can help you with your finance to ensure that you can start profiting from an investment in one of our robots today.
